Pavel Konyakhin

Frontend Developer

About

Former sailor, electrical engineer, logistic engineer and nowadays I am just at the very beginning of my path to programming. Within a year I study the Frontend languages and find it very exciting when incomprehensible sets of symbols and words for someone who is not involved, they take shapes, colors, movements, meanings. That is what I call '**The Magic**' and I wish to be a part of it.

Skills

- HTML5, CSS3
- JavaScript Basics
- SQL
- VS Code, Sublime Text, Brackets
- MySQL, Microsoft SQL Server
- Agility CMS, GraphCMS
- Git, GitHub, GitKraken, Terminal
- Figma, Photoshop, Illustrator

Code

```
var a = +parseInt(prompt('Enter a'));
var b = +parseInt(prompt('Enter b'));

if (a >= 0 && b >= 0) {
    console.log('The difference between two numbers is: ' + (a - b));
} else if (a < 0 && b < 0) {
    console.log('The product of two number is: ' + (a * b));
} else {
    console.log('The sum of two numbers is: ' + (a + b));
        }
```
